Allowable Subject Matter

1. Claims 1-23, 25-27 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art taken singly or in combination does not teach or suggest, a method for providing a processor access to image data, among other things, comprising creating first, second, and third swappable windows for accessing image data from said image, said windows being swappable so that any two are available within the memory space of the processor while a third is being loaded in a background memory (claim 1); or

the two-dimensional image storage elements comprise at least two active windows that are active in an address space of a processor and at least one shadow window that is not active in the address space of the processor (claim 19)

The closest prior art, Watkins (U.S. Patent No. 4,954,819) teaches swapping of two windows, but does not teach creating three swappable windows, in which two windows are available (active), and the other being loaded in a background memory (not active).

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
